Experience

• TravelEdge

June 2019 - present

Software Developer

Digital Back Office web application

- Primary Front-End Developer on internal web application used by the TravelEdge finance department
- Developed fully functional UI components using HTML, CSS, JavaScript, Angular8, .NET CORE and InVision Studio
- Collaborated with Data Architect to design and implement UI components to complement lower tier functionality
- Wrote and re-factored existing front-end code to be modular and reusable

Agent Digital Experience (ADX) web application

- Contributed to the development of an all-in-one virtual platform for travel agents
- Developed fully functional UI components using JavaScript, Angular8, BackboneJS, HTML, CSS and InVision Studio
- Worked in an Agile environment alongside UX team to understand and design for user needs
- Worked with BE team to optimize new features by implementing API endpoints based on DB architecture

Key Achievements:

High Margin feature release; DBO release; Helped get team's sprint completion rate above target of 85%.

• Loblaw Digital

August 2014 - Nov 2018

Content Lead (Grocery)

- Drove quality and accuracy for all product content across nine Loblaws Click & Collect websites
- Established product content model based off of upstream and downstream dependencies
- Designed and implemented all initial processes for product enrichment as well as best practices and guidelines for product content & photography
- Developed, published and maintained in-house analytic dashboards and reports for Online Store Catalogue data
- Partnered with automation and development teams to develop tools to update and QA Click & Collect website automatically

Key achievements:

Part of core team that built Click & Collect business from pre-launch through to status as Canada's #1 online grocery retailer with over 250 pickup locations nationwide.
